DETAILED ACTION

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors, e.g., typographical, grammar, idiomatic, syntax and etc. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

The abstract of the disclosure is objected to because of the inclusion of legal phraseology often used in patent claims such as "comprises " in line 7. Correction is required. See MPEP § 608.01(b).

The disclosure is objected to because of the following informalities: That this application is a 371 of PCT/FR03/01882 filed on 06/19/2003 is missing from the specification.

Appropriate correction is required.

Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Note the recitation at page 3, line 4 of "Figure 1 is a vertical section of a known still".

Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective

action in the next Office action. The objection to the drawings will not be held in abeyance.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-6 and 10-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a). The claimed “for at least partially immersion in the liquid” in claim 1, line 11 is ambiguous.

b). Claim 4 appears to be at odds with the claim from which it depends, i.e., claim 3.

Claim 3 recites “copper plates arranged vertically”, whereas claim 4 recites “copper plates arranged radially” which is inconsistent therewith. Likewise, the subject matter of claim 13 appears to be inconsistent with claim 5. [A dependent claim incorporates every features of the claim from which it directly or indirectly depends and cannot change nor orient the limitation already recited e.g., in the independent claim].

Claims 1-6 and 10-14 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a). McGraw discloses a continuous distillation unit for producing hydrated alcohol.

b). Koshoot discloses a still for alcoholic purification.
